

# CEDAR GARD™ NEWS

## Results from the Field

**JUNE 21, 2005**

**Delano, California**

**Citrus**

**Citrocola Scale** 90% control.

Red scale - works well.

**JULY 10, 2005**

**Fresno, California**

**Citrus**

**Citricola Scale.**

Replaced Lorsban - no burn, 2 quarts per acre. Good kill!

**AUGUST 2005**

**Stockton, California**

**Vegetables**

**Aphid** - early on control; with heavy populations the numbers are maintained not lowered.

**Thrip** - 100% control for a week.

we mix CedarGard with Fish as a foliar and get excellent results when sprayed every 7 - 14 days.

**AUGUST 8, 2005**

**Exeter, California**

**Citrus**

**False Chinch Bugs** were controlled on young trees and vines.

**SEPTEMBER 2005**

**Lindsay, California**

**Citrus**

**Citrocola Scale**

1 qt per acre in 100 gallons of water, 100% kill.

**NOVEMBER 1, 2005**

**Houston, Texas**

**Horticulture Nursery**

**Horticulture Nursery**

**Scale** was con-trolled

on several varieties.

**MAY 2006**

**Alberta, Canada**

**Landscape**

**Mosquitos** with OMRI approval we are now able to go forward with Cedar Gard in Canada. It works great on mosquito control! And may minimize the West Nile Virus threat!

**JULY 26, 2006**

**Modesto, California**

**Vegetables**

My growers spray every 2 weeks. Cedar Gard took care of our

**Stink Bugs**. One control block (tomatoes) could not be harvested. **Worms** and **Grasshoppers** infested the melons and were sprayed on the 26th of July. The next day worms were dead and the grasshoppers were gone. Incredible!

**MAY 2006**

**Hereford, Texas**

**Organic Dairy Farm.**

**Fly** treatment for animals and pens was successful.

**JUNE 2006**

**Fresno, California**

**Citrus**

**Citrocola Scale** - Cedar Gard mixed well with LB Urea and Nutraphite.

**JULY 16, 2006**

**Galveston, Texas**

**Resort Condominiums**

100% control of

**Mosquitoes** around the condominiums. Also sprayed inside the hallways and porches to keep them out of the accommodations. It worked!

**AUGUST 15, 2006**

**Gilroy, California**

**Heirloom Tomatoes**

**White Moths (tomato worms)**

We sprayed at flowering stage for the White Moth and prevented the Tomato Worm problem

**SEPTEMBER 20, 2006**

**Madera, California**

**Citrus**

**Citrocola Scale**

We sprayed 3 rows at a rate of 2 quarts per acre. Collected 300 leaves from the treated and untreated rows. Treatment was 100% successful.

**MAY 2007**

**Lindsay, Exeter, Woodlake, Orange Cove, California**

**Citrus**

**Citrocola Scale**

Treatment gave good results!

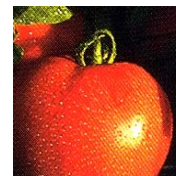

**AUGUST 2007**

**Exeter, California**

**Citrus**

**Cottony Cushion Scale**

We had surprisingly good results!

**SEPTEMBER 2007**

**Modesto, California**

**Processing Tomatoes**

Cedar Gard slows down the **aphids** enough that the beneficial insects can take care of them.

**NOVEMBER 2007**

**Dekalb Co., IL**

**Corn**

We sprayed this past July in 2000 acres of organic corn to keep out **Corn Root Worm Beetles** from the silks at pollinating. Man did it work!

**SEPTEMBER 2008**

**Dixon, CA**

**Melons & Cucumbers**

**Cucumber Beetle**

When spraying the fields we watched the **Cucumber Beetle** fly out of the field!
