

F POWER

10% Liquid Fulvic Acid

DESCRIPTION

F POWER is a commercial fertilizer which also contains Fulvic acid derived from Leonardite. Leonardite results from the decomposition and compression of organic plant materials. Fulvic acid may aid in uptake of micro nutrients.

COMPATIBILITY

F POWER is compatible with most fertilizers, pesticides, fungicides, herbicides and defoliants. In all cases, it is recommended that a jar test be made to determine compatibility of **F POWER** with other materials before proceeding with high volume mixing.

FOLIAR APPLICATION

Mix 1-2 pints of **F-Power** together with recommended fertilizer per sprayed acre. Repeat this application every 2-4 weeks for best results. **F-Power** is even compatible with phosphoric, calcium, and potassium mixes. Trees and Vines: Three applications are recommended: 1. At budding/flowering stage. 2. Clearing. 3. Fruit enlargement. Dose: 1-2 pints per acre per treatment. Row Crops: 1. Rapid growth 2. Bloom 3. Fruit set. Horticulture Crops: Three applications during the growing season: 1. At transplanting to help in root development. 2. Second and third application should be applied during the vegetative cycle to help during the vegetative cycle to help during the fruit enlargement. Dose: 1 gallon per acre per treatment.

NOTICE - Seller warrants that the product conforms to its chemical description and is reasonably fit for the purpose stated on this label when used in accordance with directions under normal conditions of use. Since weather, crop and soil conditions may vary, NRG and/or seller make no warranty of any kind, expressed or implied, concerning the use of this product. The user assumes all risks of use and handling, whether or not in accordance with directions or suggestions.

SOIL APPLICATIONS

F POWER may be used on all grain crops, potatoes, cotton, alfalfa, seed crops, beans, trees, vines, cole crops, tomatoes, sugar beets, peppers, rice, and vegetables, and horticulture crops. **PREPLANT:** **F POWER** per acre. When used with dry fertilizer, apply 1-2 gallons of **F POWER** per acre on the dry material. For best results work into the soil after application. **PLANTING:** Mix 1 gallon with a starter fertilizer in the seed bed. **SIDE DRESS:** **F POWER** can be pre-diluted and mixed with a liquid fertilizer at a rate of 1-3 gallons per acre. **TRANSPLANT:** Combine 1 gallon of **F POWER** with transplant solution before planting. **IRRIGATION:** **F POWER** may also be used in a dilute solution in sprinklers during irrigation. **DRIP IRRIGATION:** **F POWER** can be put through the drip line in small quantities over the growing seasons. Dose: 1/4 gallon per week per acre through irrigation.

STORAGE

Store in a cool, dry place. Avoid prolonged exposure to direct sunlight. Tightly re-seal after opening to preserve shelf life.

CAUTION

Product is safe and non-toxic when used as directed. Keep out of reach of children and pets! Do not inhale or digest. Avoid contact with skin, eyes, or clothing. In case of contact, flush with water. If swallowed, drink water and consult a physician.
